PROFILE

Early-career Data Analyst with a software background and hands-on practice in SQL and Python (data cleaning, EDA, reporting basics). Comfortable working with relational databases and translating findings into clear, business-friendly summaries. Seeking a Junior Data Analyst role to grow in analytics and reporting.

EXPERIENCE

Software / Systems Analyst Intern — SYS-DAT Group

Oct 2025 – Mar 2026

- Supported issue investigation and bug fixing across ERP modules with dev/support teams.
- Wrote and refined SQL queries to extract data for reporting and troubleshooting.
- Worked with large relational databases and followed internal processes (tickets, testing, documentation).
- Adapted to structured development processes: tickets, testing, documentation, and release routines.

Project Coordinator -Startup — WebWiseItalia

Mar 2023 – Jul 2025

- Coordinated day-to-day delivery in a small team, translated requirements into clear tasks, priorities, and deadlines.
- Supported data-informed decisions with basic analysis of internal/public datasets (trends, simple KPIs, summary reporting).
- Tracked tasks and blockers and shared regular progress updates with stakeholders.

IT Consultant / Web Developer — Freelance

2020 – Mar 2022

- Provided IT Consulting and Web Development services for small businesses, working closely with clients to translate business requirements into technical solutions, mostly on the digital presence of their businesses.
- Supported basic data handling and reporting activities related to digital products.
- Gained Experience in project coordination and collaborations.

PROJECTS

Customer Churn Analysis & Prediction - Banking Dataset

- End-to-end project: EDA, Data Cleaning, Segmentation and Business Insights with Python (Pandas)
- Identified key churn drivers and customer segments; communicated insights with clear visualizations and narrative.
