SUMMARY

I work across IT management, automation and AI. I build Python tools, machine learning models and LLM integrations that simplify business operations, and I am growing towards AI engineering.

SKILLS

Python: scripting, pandas, openpyxl, data processing, data pipelines, API integration, process automation

Machine learning: regression, classification, decision trees, LightGBM; feature engineering, model evaluation

AI: AI agents and automated workflows, chatbots, LLM integration, RAG with vector databases

Data: cleaning, analysis and reporting with pandas, SQL and Excel

IT infrastructure: servers, virtual machines, Active Directory, network configuration, Microsoft 365 administration

Tools: Git, VS Code, Jupyter Notebook, Claude Code, n8n

EXPERIENCE

AI & Automation Specialist | IT Manager — Zeis Excelsa S.p.A., Montegranaro **Jun 2026 – Present**

Hired mainly to build automations and support AI adoption.

- Rebuilt the company's barcode decoder from scratch in Python, as a web app on the local network, to make reading merchandise barcodes simpler and faster.
- Developed Python tools that automate commercial reporting and support logistics and data reconciliation.
- Use LLMs and AI tools every day for development and analysis, and help colleagues adopt them.
- Run IT and consolidate the infrastructure: servers, VMs, Active Directory, network configuration, Microsoft 365.
- Coordinate external vendors and the company's technology projects.

Automation Specialist (Freelance) — Nexux Studio · nexuxstudio.it **Feb 2026 – May 2026**

- Analysed and redesigned an inefficient lead intake process: n8n workflows connecting Telegram and WhatsApp chatbots, Google Workspace and LLM APIs to score and classify each lead.
- Automated emails and real-time phone notifications for the owner, with separate paths by lead type and human approval at set steps, so first contacts are handled promptly.

Software Developer – ERP (Internship) — SYS-DAT Group **Oct 2025 – Feb 2026**

- Helped develop and maintain D-Moda Web and D-Moda Retail, management software for fashion companies.
- Maintained and updated legacy code, using SQL, XML and JavaScript to find and fix application bugs.

Project Coordinator — WebWiseItalia (startup) **Mar 2023 – Jul 2025**

- Coordinated a small team of a designer, a developer and a salesperson, setting priorities and deadlines.
- Delivered web apps, landing pages and showcase websites for small-business clients.

PERSONAL PROJECTS

F1 Race Predictor — lorenzosantarelli.com/f1-predictor · github.com/lost-95/f1-predictor

- Web application that predicts Formula 1 race results from about 25 years of race history and weather data.
- Data pipeline from public APIs and LightGBM ranking models, validated season by season on unseen races.

Customer Churn – Banking | Data Analysis & Segmentation — github.com/lost-95/customer-churn-banking

- Analysis of 10,000 bank customers to find churn drivers: data quality checks, exploratory analysis, segmentation.

EDUCATION

BSc Computer Science (in progress) — University of Camerino (UNICAM)

Erasmus exchange – Computer Engineering — Universidad de Sevilla (Sep 2022 – Feb 2023)

Technical High School Diploma — Information Technology
